What I wanted?

“Catania Evaluation Form”

What I wanted?

The aims referred about Catania RC Meeting was to find **inspiration**, **motivation** and “**commitment** to start researching”; **learn** how to do and **exchange** research methods as process; to find **support**, **cooperation** and **fun** during research, in other words, create a **network** in order to reduce the isolation. In an institutional level was also referred to “increase **professional** exchange inside FEPTO groups and **improve** the **research** in **Psychodrama**.”

“Catania Evaluation Form”

What I
achieved?

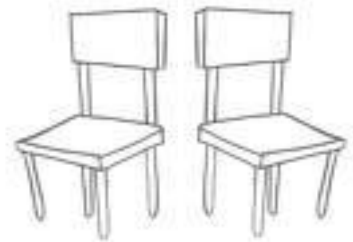

“Catania Evaluation Form”

What I
achieved?

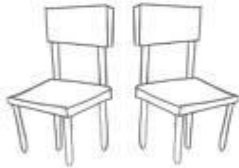

The work done (in **small** and **big group**) was **productive** and stimulating. It was created a cooperative, friendly and **proactive** atmosphere to deep in to **psychodramatic** research. The process was very rich and allowed people to embrace the goals of each workgroup and to share it with all members. It was possible to see a **network** become more effective for **developing research** in the different countries.

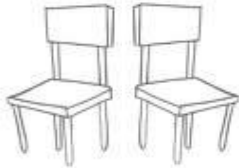

“Catania Evaluation Form”

What I wish?

Big Group Work

Small Group Work

To know more about some research aspects

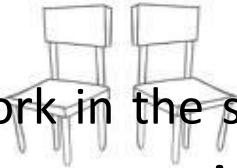

Specific Aspects

“Catania Evaluation Form”

What I wish?

Continuous work in the small group and **exchanging** with the other groups, also have time to share and **integrate** the work done in the big group. **Update** the work done in these last months after Catania. Having more information and theoretical discussion about **research aspects** (as instruments and different perspectives of the **psychodramatic** methodology).
